

Proceeding 04-233

To Whom it may Concern: I am very concerned about your campaign to localize FM signals utilizing the Low Power FM service and the effect it will have over current FM translator service. We currently listen to K-LOVE on three translators in our area (90.1, 93.1, and 104.3) and have several interfering local broadcasts already. K-LOVE serves our community by providing family-friendly radio all day, every day. We never have to worry about our children hearing inappropriate language or music on this station. We have yet to find a similar family station in this area. I believe that LPFM will hurt the public here in Little Rock and central Arkansas because our area needs family broadcasts available in the car and at home every day of the year. While many local stations cater to the college-aged, not one fills the need that K-LOVE fills so well.
